I was honoured to be invited to speak at Dayton FDIM in May 2010 on the subject of QRSS.

Here are a couple of photos of me giving the presentation:

{gallery}qrsskit/4{/gallery}

I'd brought with me nearly 100 [30m QRSS Transmitter Kits](#) produced by Steve G0XAR and I and priced at \$15 US. In the coffee break immediately after my talk, I had over 50 orders! That evening was "vendors evening" and there was quite a pileup, it took me nearly 4 hours to work through the queue and program everyone's kit! Here's some photos of the pileup:

Finally, a couple of photos of George G3RJV ([G-QRP club](#) founder), [David Azbill AF8D](#) and myself on the way to the Dayton hamvention, the largest hamvention in the world.
